This action is response to applicants' amendment of 19 October 2010. The terminal disclaimer filed on 19 October 2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 10/574,662 has been reviewed and is accepted. The terminal disclaimer has been recorded. Accordingly, the provisional obviousness-type double patent rejection is withdrawn. The cancellation of claim 14 has overcome the provisional 35 USC 101 rejection. Applicant's arguments with respect to the remaining rejection have been fully considered but they are not persuasive.

Claims 20-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are indefinite since they are improperly dependent and the preamble does not match the preamble of the claims from which they depend. These claims are to the "composition or value document according to claim 1 or 18", but claim 1 is not directed to a value document and claim 18 is not directed to a composition.

It is suggested to either amend these claims to state "The composition according to claim 1 or the value document of claim 18" or to amend claims 10-28 to be directed to "The composition according to claim 1" and then add new claims 29-37 directed to "The value document according to claim 18" which include the limitations of claims 20-28, respectively, in each new claim to overcome this rejection. This means claim 29 should read "The value document according to claim 18 wherein said joint emission range extends in a range of from about 800 nm to about 2200 nm."

The amendment to these claims did not overcome the rejection.

Claims 1-13 and 15-19 are allowable over the cited art of record.

Claims 20-28 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

There is no teaching or suggestion in the cited prior art of record of a composition having the claimed emission characteristics or a value document comprising the claimed composition.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
